PROFESSIONAL SUMMARY

Recent Computer Science Engineering graduate with hands-on experience in Python, SQL, Machine Learning and Generative AI. Built end-to-end data-driven solutions including fraud detection systems, career recommendation engines and multi-agent AI assistants using LangChain and Llama models. Passionate about developing AI-powered applications and solving real-world problems through technology and continuous learning.

INTERNSHIPS

- Central Tool Room & Training Centre, Artificial Intelligence / Machine Learning Intern**06/2025 – 07/2025 | BBSR
 - Worked on real-world ML projects using Python and Scikit-learn.
 - Performed data preprocessing, feature engineering and trained predictive models.
 - Evaluated model performance and derived insights to solve practical business problems.
- NIST University, Data Science Using Python Intern**06/2024 – 07/2024
 - Gained hands-on experience in data analysis and visualization using Python.
 - Built end-to-end projects involving data cleaning, EDA and predictive modeling.
 - Strengthened skills in Pandas, NumPy, Matplotlib and Scikit-learn.

EDUCATION

- B.Tech in Computer Science Engineering,**2023 – 2026 | Berhampur
National Institute of Science & Technology (NIST University)
CGPA: 8.24
- SCTE&VT (Diploma), Uma Charan Patnaik Engineering School**2020-2023 | Berhampur
Percentage: 79.2%

TECHNICAL SKILLS

Programming Python, SQL, C	Other MS Excel, Data Visualization, REST APIs	Data Science Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn	AI / LLM LangChain, Ollama, Llama 3.2, Prompt Engineering
Tools Git, GitHub, VS Code, Jupyter Notebook, Streamlit, Google Colab			

CERTIFICATIONS

- Data Analytics Essentials**
Cisco Networking Academy
- Data Science Using Python**
NIST University

RELEVANT COURSEWORK

- Relevant Coursework**

PROJECTS

- Multi-Agent AI Travel Assistant | Python, LangChain, Ollama, Streamlit, Llama 3.2**
 - Developed a multi-agent AI assistant for personalized travel itineraries, budget estimation, hotel recommendations, attractions and tips.
 - Designed supervisor-based architecture with specialized agents for itinerary planning, budgeting, hotel search, attractions and travel tips.
 - Integrated LangChain and Ollama to leverage locally hosted Llama 3.2 models, eliminating dependency on paid external APIs.
 - Built interactive Streamlit web application and modular agent-based design for scalability and maintainability.
- Credit Card Fraud Detection | Python, Pandas, NumPy, Scikit-learn, SMOTE**
 - Built an end-to-end ML pipeline for credit card fraud detection including preprocessing, feature scaling and model evaluation.
 - Addressed class imbalance using SMOTE to improve detection of fraudulent transactions.
 - Trained and compared Logistic Regression and Random Forest models.
 - Achieved 98.5% ROC-AUC, 96.7% Precision, 94.3% Recall and 95.5% F1-score with Random Forest.
- Smart Career Recommendation System | Python, Scikit-learn, NLTK**
 - Developed AI-powered system to predict suitable career paths based on user skills using ML and NLP.
 - Implemented Random Forest classifier for accurate career recommendations with confidence scores.
 - Built skill gap analysis and similar career suggestions to enhance recommendation quality.
 - Created visualization dashboard to analyze skill demand trends and career distribution.
